INTRODUCTION

This is the final statistical report for FY 1985. Data contained herein cover the time period beginning October 1, 1984, and ending September 30, 1985. Selected comparative data are also presented for fiscal years 1983 and 1984. Statistics for these years are updated figures and, thus, replace those presented in previous statistical reports.

The FY 1985 data contained in this report are generally complete. All data are routinely subjected to quality control reviews and thus slight modifications may occur. All updated figures will be published in future statistical reports. Users are reminded that any data deficiencies are noted in the data element narratives contained in Part V of this report.

During FY 1985, several State and Local Task Forces were added to DEA's official State and Local Task Force Program. Many of these Task Forces functioned in prior years as unofficial task forces and their accomplishments were not included in State and Local Task Force Program statistics. These new official Task Forces began to use the State and Local Task Force G-DEP identifier to report data over the course of FY 1985. Therefore, comparison of FY 1985 Task Force Program data with that of prior years is not strictly valid.

Two sections are included in this report that have not been a part of previous editions. Part III, "National Data Summary by Source of Investigation" presents data in the format used in DEA budget documents. Part IV displays data based upon the new G-DEP parameter "Investigative Target." This parameter was instituted in FY 1985 and, therefore, FY 1985 data associated with investigations initiated prior to October, 1984, are either not included in the target listings or are labelled "Pre-FY 85 Investigation."

PART I: STATISTICAL SUMMARY

DRUG ENFORCEMENT ADMINISTRATION
NATIONAL STATISTICAL SUMMARY
FY 1985

Total DEA Domestic

Average Number of Special Agents on Board During FY 1985 *		1,779
Total Special Agent Workhours **		4,696,632
Total Special Agent Investigative Workhours		3,118,638
% of Special Agent Workhours that are Investigative		66.4%
Total Case Class I and II Special Agent Workhours		2,413,248
% of Special Agent Investigative Workhours that are Case Class I and II		77.4%
Average Number of Intelligence Specialists on Board	74	
Number of Special Agents Assigned to Intelligence Positions	54	
Total Number on Board during FY 1985		128
Total Intelligence Program Workhours		346,799
Total Intelligence Program Investigative Workhours		123,822
% of Intelligence Program Workhours that are Investigative		35.7%
Total Case Class I and II Intelligence Program Workhours		80,911
% of Intelligence Program Investigative Workhours that are Case Class I and II		65.3%

* Special Agents assigned to Intelligence positions are included in the Intelligence Program data.

** Average of four quarters: September, 1985, On Board data not included in calculations.

Headquarters data are not included in any statistical summary figures.

DRUG ENFORCEMENT ADMINISTRATION
NATIONAL STATISTICAL SUMMARY
FY 1985

Total DEA Domestic

Average Number of Diversion Investigators on Board during FY 1985*	155
Total Diversion Program Workhours	314,960
Total Diversion Program Investigative Workhours (Non-Cyclic and Regulatory)	166,581
% of Diversion Program Workhours that are Investigative	52.9%
Total Non-Cyclic Investigative Workhours	106,014
% of Diversion Investigative Workhours that are Non-Cyclic	63.6%
Total Case Class I and II Non-Cyclic Investigative Workhours	44,298
% of Non-Cyclic Investigative Workhours that are Case Class I and II	41.8%
Total PE/PI Expenditures**	$14,619,961
Total Case Class I and II PE/PI Expenditures	$13,536,750
% of Total PE/PI Expenditures that are Case Class I and II	92.6%

* Average of Four Quarters

** Includes State and Local Task Force and OCDE expenditures, unlike previous editions.

DRUG ENFORCEMENT ADMINISTRATION
NATIONAL STATISTICAL SUMMARY
TOTAL DEA DOMESTIC

	FY 1983	FY 1984	FY 1985
Domestic Drug Removals:			
Heroin (kg)	302.1	346.4	446.2
% in Case Class I and II	59%	57%	75%
Cocaine (kg)	7,399.1	11,742.3	17,613.1
% in Case Class I and II	85%	91%	93%
Cannabis (kg)	1,029,825.2	1,399,925.9	740,270.6
% in Case Class I and II	87%	89%	82%
Dangerous Drugs (du)	19,785,043	13,777,025	25,868,565
% in Case Class I and II	52%	76%	81%
Clandestine Laboratory Seizures	187	198	329
Narcotic Title III Intercepts	76	83	136
Asset Removals			
Total Seizures **	N.A.	$150,975,170	$219,999,941
DEA Seizures	$95,650,412	$92,544,561	$153,384,750
Seizures Through Interagency Cooperation	N.A.	$58,430,609	$66,615,191
DEA Forfeitures	N.A.	$30,248,199	$49,802,970
Fines ***	N.A.	$16,446,865	$7,403,931
Judicial Bond Forfeitures	N.A.	$3,489,050	$2,160,817
Abandonments	N.A.	$386,177	$616,912
Number of Persons Indicted****	*	6,442	9,279
Criminal Case Files ****			
Number Initiated	*	6,026	9,337
Number Closed	*	6,148	7,508
Number Open as of indicated date	*	14,628	16,971

* Data are not available for this time period.

** "Total Seizures" include DEA Seizures and Seizures Through Interagency Cooperation.

*** "Fines" refer to all criminal and civil fees levied.

**** Indictment and Criminal Case File data are derived from the Monthy Activity Summaries submitted by DEA Domestic Field Divisions. Open Case Files include both active and disposition-pending criminal cases. Indictment and Criminal Case File data are not available for the First Quarter of FY 1984. Thus, any figures shown for FY 1984 commence with January 1984 statistics.

DRUG ENFORCEMENT ADMINISTRATION
NATIONAL STATISTICAL SUMMARY

Total DEA Domestic

	FY 1983	FY 1984	FY 1985
Total Domestic Arrests	12,997	13,126	15,695
Total Domestic Case Class I and II Arrests	6,816	7,451	9,359
% of Total Domestic Arrests that are Case Class I and II	52.4%	56.8%	59.6%
Total Domestic Violator Class I and II Arrests	2,495	2,849	4,041
% of Total Domestic Arrests that are Violator Class I and II	19.2%	21.7%	25.7%
Total Domestic Convictions	9,973	10,809	10,549
Total Domestic Case Class I and II Convictions	4,870	5,638	6,232
% of Total Convictions that are Case Class I and II	48.8%	52.2%	59.1%
Total Domestic Violator Class I and II Convictions	1,863	2,219	2,592
% of Total Domestic Convictions that are Violator Class I and II	18.7%	20.5%	24.6%

NOTE: Arrests and Convictions do not necessarily refer to the same individuals.

PART V: DATA ELEMENT SUMMARIES

ARRESTS/CONVICTIONS

DATA DESCRIPTION

Arrest and conviction statistics are obtained from the Offender Based Transaction System, a computerized file of arrest information from the DEA Form 202 and conviction information from the DEA Form 210. These data are based upon reports received in DEA Headquarters during FY 1985. Arrests and convictions reported for this time period do not necessarily refer to the same persons due to the time between an arrest and subsequent conviction.

Data pertaining to the DEA State and Local Task Forces refer to officially funded Task Forces and those unofficial task forces that are now using the G-DEP identifier reserved for the State and Local Task Force Program. In the Statistical Summary Section of this report, Florida Joint Task Group arrests and convictions are included under the "Total Domestic" summary as well as the "DEA Domestic - Excluding State and Local Task Forces" summary. In the Source Summary for arrests and convictions, Florida Joint Task Group Data are included under the DEA Initiated category.

Total Domestic Arrests by Nationality tables reflect the nationality of persons arrested in cases conducted by offices in the domestic field divisions, including Caribbean offices that are under the jurisdiction of the Miami Field Division. As stated in the footnote to the tables, the "All Others" and "Unknown" categories represent unreported data.

DATA ANALYSIS

Arrests

DEA arrested 15,695 drug law violators in FY 1985, which represents an increase of 19.6 percent over FY 1984 and is the largest annual arrest total in the past decade. Arrests in class I and II cases rose 25.6 percent in FY 1985, continuing a three year trend that has seen those arrests increasing relative to arrests in class III and IV cases.

A second, and similar, trend is apparent in arrests made in cocaine cases, which were up 36.3 percent in FY 1985. During each of the past three fiscal years, arrests in cocaine cases have accounted for larger proportions of total arrests (37.5 percent in FY 1983, 42.5 percent in FY 1984, and 48.3 percent in FY 1985). This contrasts with the trend of arrests in cannabis cases, which have decreased both in absolute terms (from 3,720 in FY 1983 to 2,966 in FY 1985) and relative to total arrests (28.6 percent in FY 1983 to 18.9 percent in FY 1985). It should be noted that while those arrests have decreased, there has been a qualitative change as more of the cannabis arrests have been made in class I and II cases. This trend in cocaine and cannabis cases is consistent with the national trend evidenced by State and local arrests shown in the FBI Uniform Crime Reports.

Convictions

Convictions are not a measure of enforcement activity during the year in which the judicial disposition was reported because over three-fourths of the arrests that led to the convictions took place during an earlier year. Typically, three to five years will elapse before the convictions are obtained for a given year's arrests. This is shown by the fact that conviction statistics have similar trends as arrests, but the magnitude of the trend is less.

10,549 convictions were reported in FY 1985, and that level is consistent with the two preceding fiscal years. As was true for arrests, convictions in class I and II cases increased as a percent of total convictions from 48.8 percent in FY 1983 to 59.1 percent in FY 1985. There also is a trend of more convictions in cocaine cases and fewer convictions in cannabis cases for those fiscal years, but the magnitude of the change (a 3 percent increase in cocaine case convictions and a 3 percent decrease in cannabis case convictions) is less pronounced for convictions than arrests. This is probably a result of the previously mentioned delay that exists between arrests and subsequent convictions.

WORKHOUR REPORTING SYSTEMS

Workhour data for Special Agents are reported by DEA field divisions on DEA Form 444 and processed by the Statistical Services Section by means of an interim ADP system to produce statistical reports of the type included in this publication. Comparable data for Diversion Investigators and DEA's Intelligence Program are reported by means of DEA Form 351 and a monthly Intelligence Workhour Summary, respectively, and processed in a similar manner.

Data reported through these systems provide a detailed level of information for each field division regarding the expenditure of investigative workhours by G-DEP parameters (case, target and scope, drug, and source) and the allocation of all workhours by both investigative and non-investigative activities.

Workhour reporting for all systems (Special Agents, Diversion and Intelligence) now reflect the new G-DEP parameters. In the computer-generated Special Agent and Intelligence Workhour Summaries, G-DEP Source is summarized in the following manner: DEA domestic includes joint foreign, OCDETF, and Florida Joint Task Group; Federal Referrals includes joint Federal. The remaining G-DEP parameters are reported as described in the Agents Manual, Chapter 62, Subchapter 6221. In Part II of the Diversion Workhour report, "Criminal Investigations" has been changed to "Non-Cyclic Investigations" in order to more accurately reflect the diversion workhours.

Yet, while the data are nearly complete, Special Agent workhours for the Springfield, Illinois Resident Office for the month of November are not included in its respective Divisional statistics.

Intelligence workhours for the St. Louis Resident Office are incomplete due to lack of reporting for July. In addition, the FY 85 Intelligence workhours for the following HQ offices: OIS, OIOM, OIO, OIFI, OISE, OIOO, OISP, OISL and OIFS, are incomplete due to incomplete reporting during the year,

Special Agent Workhours*

DOMESTIC DRUG REMOVALS

Drug Removals Analyzed by DEA Laboratories and Reported through STRIDE

DEA domestic drug removals reflect totals of all drugs purchased, seized, or otherwise obtained through DEA-controlled and DEA-cooperative investigations with Federal, state and local law enforcement agencies reported in DEA's System to Retrieve Information from Drug Evidence (STRIDE). The total amount or a representative portion (sample) of the total amount of drug collected is submitted to DEA laboratories for analysis, accompanied by a completed DEA Form 7 (Report of Drug Property Collected, Purchased or Seized). The results of the chemist's analysis, recorded and reported on a DEA 86 (Chemist's Worksheet), and information from the DEA 7, which include the amounts of drug removed, are entered into STRIDE.

Drug removal data are displayed by major drug categories. Heroin, cocaine, marijuana and hashish are reported in net weight. Dangerous drugs (stimulants, depressants, hallucinogens) are reported in dosage units (tablets, capsules, etc.). The columns of the tables are the G-DEP class of case in which the removal occurred.

It should be noted that Florida Joint Task Group (FJTG) data were previously included in the drug removal summaries for DEA State and Local Task Forces. However, in this report the FJTG data for FY 1984 (extracted from the Miami State and Local Task Force portion) and the Joint DEA/Customs (1985) data are now included in the "Total Domestic" and the "Excluding State and Local Task Forces" portions of the Drug Removal Summary.

Additionally, as a result of STRIDE data entry problems, the removal data for the Miami and Atlanta Field Divisions do not completely reflect all FY 1985 drug removals. The missing data will be included in the first quarter FY 1986 Statistical Report and be available for use prior to publication of that report.

Nationwide, drug removals of heroin and cocaine have steadily increased over the past several years. The more significant yearly increases have occurred in cocaine seizures with a 59% increase in FY 1984 and a 50% increase in FY 1985. Heroin removals increased 15% in FY 1984 and 29% in FY 1985. Removals of dangerous drugs almost doubled in the past year from 13,777,025 d.u. in FY 1984 to 25,868,565 d.u. in FY 1985. There was a 47% decrease in cannabis removals in FY 1985.

Since one large seizure may distort a yearly total, drug removal statistics do not always indicate trends or patterns. However, it should be noted that over the past three years the Miami Field Division led the DEA divisions in cocaine and cannabis removals and New York was the leader in heroin removals. Additionally, removals of these drugs in the two divisions have increased each year. In fact, the FY 1985 cocaine figure for removals in the Miami Field Division is more than three times the FY 1983 total and 55% greater than the FY 1984 figure. Los Angeles was the second leading division in heroin removals in both FY 1983 and FY 1984, and was third in FY 1985. Because of one very large heroin seizure, the Seattle Field Division was second in FY 1985.

Non-Analyzed Drug Removals Reported via "INFORAMTION DEA FORM 7."

Drug removals will be reported without being analyzed by a DEA laboratory when DEA participates in or contributes to an investigation that results in a drug acquisition by another agency and DEA neither takes custody nor submits a sample to a DEA laboratory.

An "Information DEA Form 7" will be completed in the above instance and a copy forwarded to HQ PES for statistical reporting purposes.

Total drug removals reported in this fashion are displayed by major drug categories whenever possible and in gross weight only.

ASSET REMOVALS

Description of the Asset Removal Data Base

Seizure and forfeiture statistics were obtained in FY 1985 from two data bases. They are the Computerized Asset Program (CAP), maintained by the Office of Chief Counsel, and the Asset Removal System (ARS), which is administered by the Statistical Services Section (PES) of the Office of Planning and Evaluation. Each system is briefly described below.

Computerized Asset Program (CAP)

In FY 1985, six divisions (Atlanta, Boston, Miami, Newark, Philadelphia, and Washington, D.C.) were on-line, and the asset removal statistics for these divisions were compiled using the CAP system, which is now operating on the M204 computer network. Data for these six CAP divisions were also arrayed for the various offices within the divisions. Further programming changes are being made which will allow better interpretation of the data. Presently, one of the limitations of the CAP system causes under-estimation of forfeited assets. We hope to update the full forfeiture data in the FY 1986 first quarterly report. Additionally, starting on January 1, 1986, all divisions within DEA began using the CAP system for new seizure actions. Therefore, in FY 1986 most of the asset and forfeiture data will come from the Computerized Asset Program.

Asset Removal System (ARS)/440 System

Thirteen of DEA's nineteen divisions used the ARS during FY 1985. During the 4th quarter of FY 1985, the data of this system were reprogrammed from the Pathfinder System to M204. Programming changes are still being made to facilitate more effective retrieval of data. However, starting January 1, 1986, all divisions began using the Computerized Asset Program for seizures initiated after that date.

Since FY 1984, increased standards for quality control have been imposed on the data presented in this report. These increased standards were used in compiling the FY 1985 Annual Report. A number of previously reported forfeiture actions (440's) which were resubmitted were deleted. Despite these improved quality measures, forfeiture totals increased to a record level ($49,802,970).

In FY 1985, the percentage of Asset Removal Reports (440s) returned to the field by the Statistical Services Section (PES) continued to decline. However, because of the system conversion process and some divisions' continued practice of sending in duplicate and triplicate copies of forms, production of the year-end statistics was made much more difficult. For the open (old) cases in which a seizure has taken place, divisions are required to send PES only one copy (#2) of the Asset Removal Report (440).

FY 1985 Asset Removal Accomplishments

For FY 1985 the asset removal activities were at record setting levels. DEA and Total Seizures, as well as DEA Forfeitures, are greater than any previous years. DEA seizures have never been higher than those made in FY 1985 ($153,384,750) and exceeded last year's "Total Seizures" amount. The DEA Seizures exceed the FY 1984 ($92,544,561) base by 65.7%. To demonstrate that DEA is following its policy of targeting and immobilizing the highest levels of the traffic, this year there were 26 seizures of over $1,000,000.

Comparison of pre-FY 1984 total seizures with subsequent years' totals is discouraged because the data included civil and judicial fines, bond forfeitures, and abandonments, and were subjected to less stringent quality controls. However, a comparison of FY 1984 ($150,975,170) and FY 1985 ($219,999,941) for "Total Seizures" shows that DEA not only seized more traffickers' assets than ever before, but that the amount increased by 45.7% over the previous year.

DEA forfeitures also continued to remain at a high level, with $49,802,970 being forfeited. This is a 64.6% increase over last year's forfeiture amounts (FY 1984 $30,248,199 vs FY 1985 $49,802,970).

NATIONAL TOTAL	219,999,941	153,384,750	66,615,191	49,802,970

* FY 85 figures represent those cooperative seizures processed by another Federal or State/Local agency and do not include Fines or Bond Forfeitures.

** This figure includes forfeitures of assets seized during previous years.

DRUG ENFORCEMENT ADMINISTRATION
FY 1985

AGENCY TOTALS

	DOLLAR AMOUNT	TOTAL NUMBER	AVERAGE
Fines	7,403,931	1,016	$7,287
Bond Forfeitures	2,160,817	49	$44,098
Abandonments	616,912	52	$11,864

The totals represent both DEA and DEA cooperative cases. Fines are for both judicial, civil and criminal fines which have been imposed by the court system against DEA's drug violators. Bond Forfeiture data represent the total amount of levies against drug traffickers in this area. Abandonment data refer to money or property against which abandonment proceedings have been successfully taken in drug cases.

PE/PI

PE/PI is the budgetary category for those funds appropriated for the purchase of evidence (PE) and the payment for information (PI). It is only through expenditures (DEA Form 103) that PE/PI utilization can be tracked vis-a-vis G-DEP, and accurate forecasts of future needs can be projected. Such expenditures are reported into the Drug Enforcement Administration Accounting System (DEAAS).

DEAAS is an accounting and financial management system that is designed to provide DEA management with current fiscal information. DEAAS is both an on-line and a batch processing system. The on-line subsystem provides for comprehensive editing of input data. The batch subsystem provides for a great volume of accounting reports which are produced on a monthly basis. PE/PI Analysis by Drug and Level is one such report.

PE/PI is one of the data elements in which the computer-generated document has not been reproduced for use in this Statistical Report. Further refinements to the programming must be made before PE/PI information can be generated in the specific statistical format compatible with this report.

The PE/PI tables reflect expenditures entered as of September 30, 1985. It should be noted that, unlike previous editions, data for state and local task forces (S/L TFs) and OCDEs are displayed. However, PE/PI expenditures for other special operations, such as SFIPs and SEOs, are not included, but can be provided on an ad hoc basis.

Nationwide, the percentage of PE/PI which was expended in upper level cases increased significantly in FY 1985. Excluding S/L TF and OCDE data for comparison purposes, Case Class I and II PE/PI expenditures represented 91.5% of the FY 1985 total as compared with 57.6% of the FY 1984 total.

CLANDESTINE LABORATORY SEIZURES

Clandestine Laboratory Seizures is one of the data elements in which the data collected are not maintained by an automated system. These statistics are collected and maintained by the Domestic Unit of the Strategic Intelligence Section (OISD) at DEA Headquarters. OISD obtains these data through the review of any DEA Form 6 or any cables from the field reporting lab seizures as well as from the Clandestine Laboratory Reports which are filed subsequent to a lab seizure by the DEA chemist present during the seizure action.

The tables represented in this report are those illicit drug manufacturing plants discovered and seized by DEA in the course of its domestic criminal investigations.

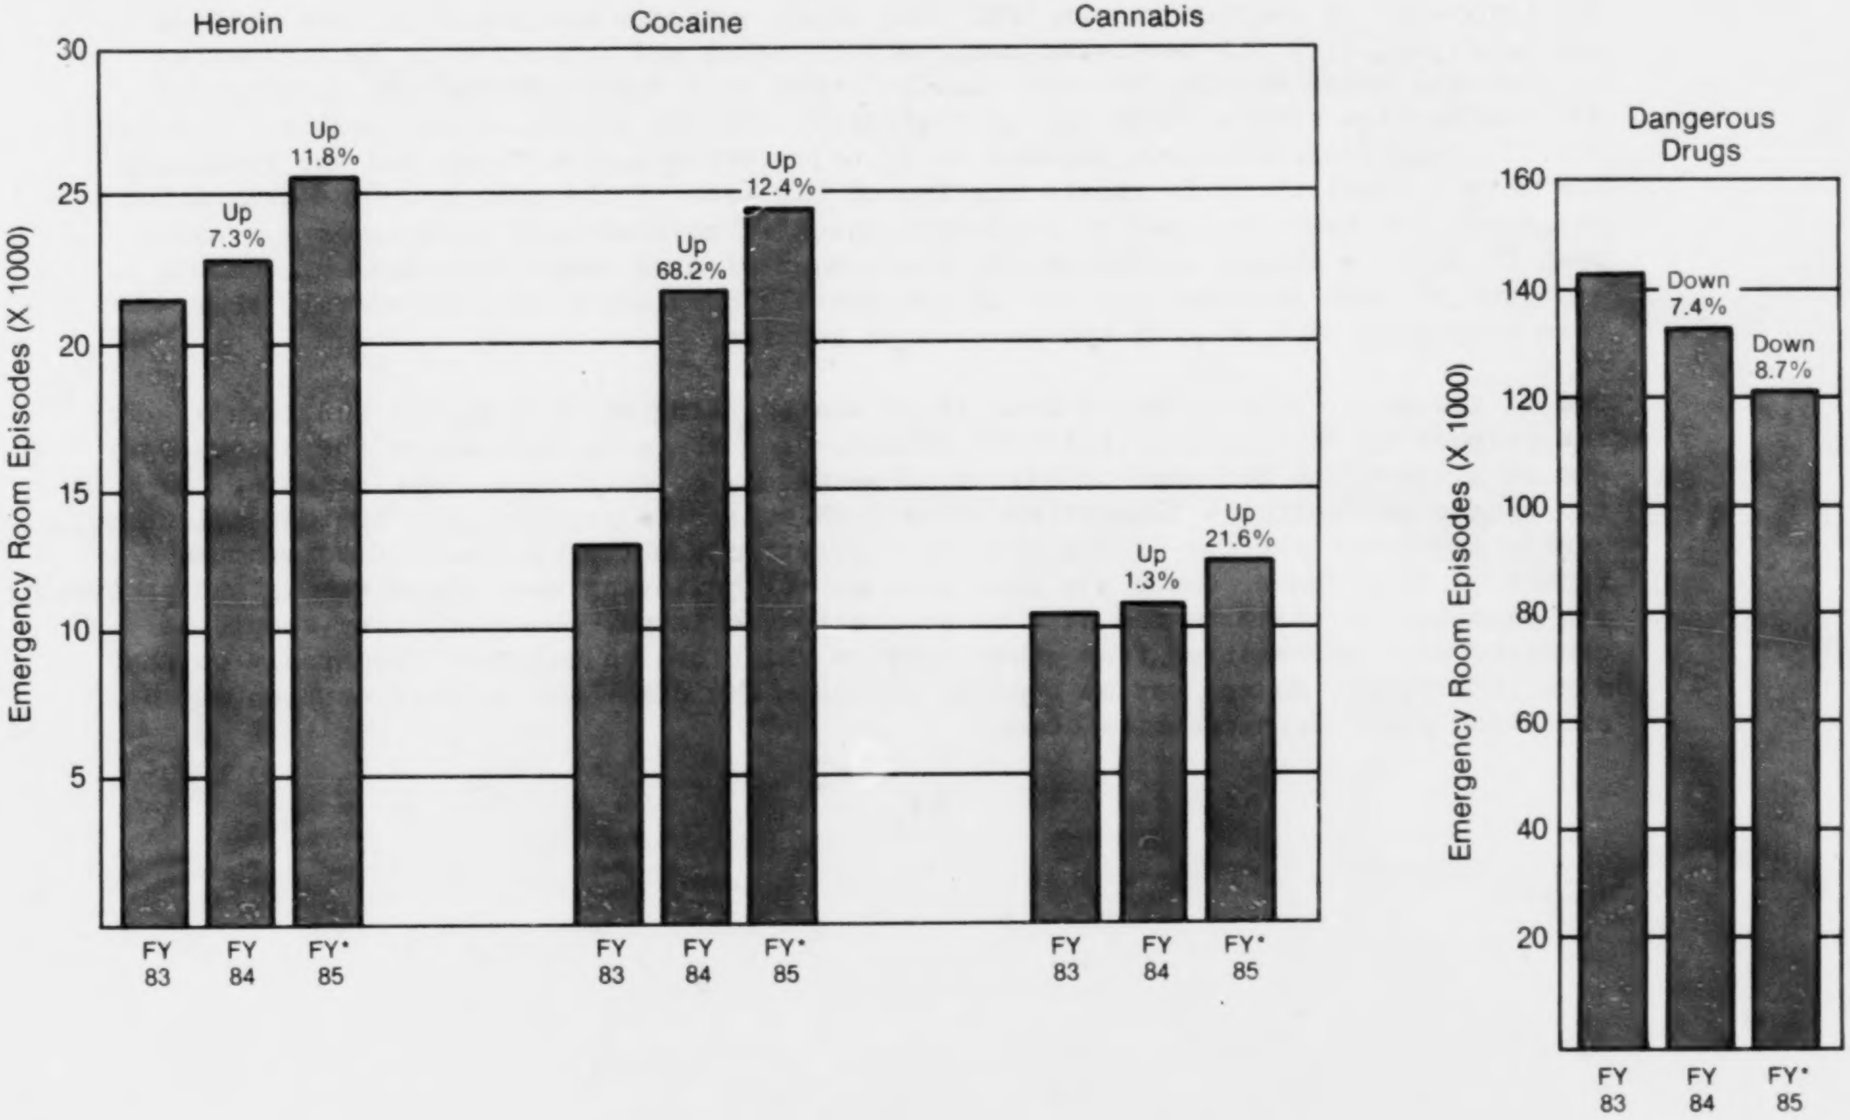
EMERGENCY ROOM DRUG ABUSE EPISODES

The estimates of emergency room (ER) drug abuse episodes contained in this section are generated by a DEA-developed mathematical model and are based on data reported to the Drug Abuse Warning Network (DAWN). DAWN is a Federally-funded, large-scale data collection system which has approximately 750 ERs reporting nationwide. Nearly 600 of these facilities are located in 27 major metropolitan areas and the remaining ERs form a panel which is representative of the rest of the country. The estimation procedure has been designed to implement specific mathematical techniques for using DAWN ER data to obtain estimates for the number of drug abuse episodes which could be expected if DAWN included all ERs in the overall population of non-Federal, short-term hospitals with 24-hour emergency room service.

One of the major objectives of DAWN is to monitor drug abuse patterns and trends. For the purpose of reporting to the DAWN system, drug abuse is defined as the non-medical use of a substance for psychic effect, dependence, or suicide attempt/gesture. Although the trends and patterns identified using DAWN estimates pertain only to that select but highly important portion of the abusing population seeking emergency treatment as a result of drug abuse, there are good reasons for believing that these trends and patterns are parallel to those in the abusing population at large. However, they should be compared with information from other sources which can be analyzed comparably so that each information source may be used to validate the other and so that caution may be exercised where disagreements occur.

Nationwide Estimates of Emergency Room Drug Abuse Episodes Involving Selected Substances.



*FY 1985 Estimates Are Preliminary and Subject to Updating.
